senses[®]
absolute wood experience

There is nothing in the intellect that was not first in the senses.

Aristotle

A touch of design

A woman's view of luxury

Patrycja Zaczynska – is one of the most promising Polish architects in the world. She has an architect's licence both in Poland and the UK, and is a member of the prestigious British RIBA. A founder of the ADP ARCH LTD international design bureau, which specialises in designing luxury buildings and interiors.

The wide experience she has acquired in prestigious New York and London studios, has allowed her to participate in the creation of many interesting projects. These have been located in various parts of the world, including Monte Carlo, New York, London and Moscow.

In 2012 the studio's portfolio expanded to include the concept design of exclusive interiors for the Złota 44 apartment building in Warsaw, designed by Daniel Libeskind, considered one of the most outstanding architects of the 21st century.

Her studio has also collaborated with renowned foreign partners creating boutique projects for the world's largest fashion houses, including Balenciaga and Bottega Veneta (Gucci Group).

Photo - Barlinek/Bookkova

The SENSES collection was created in collaboration with the architect Patrycja Zaczynska. Her wealth of international experience combined with Barlinek's expert knowledge enabled the creation of a collection which reflects the best trends in world design.

The above standard width of the boards, entrancingly subtle colour scheme and the deliberate rawness of the finishing form the essence of the sensual style of SENSES. The collection is dedicated to people aware of the power of detail, who know that in an exclusive interior less is more, and that beauty lies in the quality of the raw material and the precision of execution.

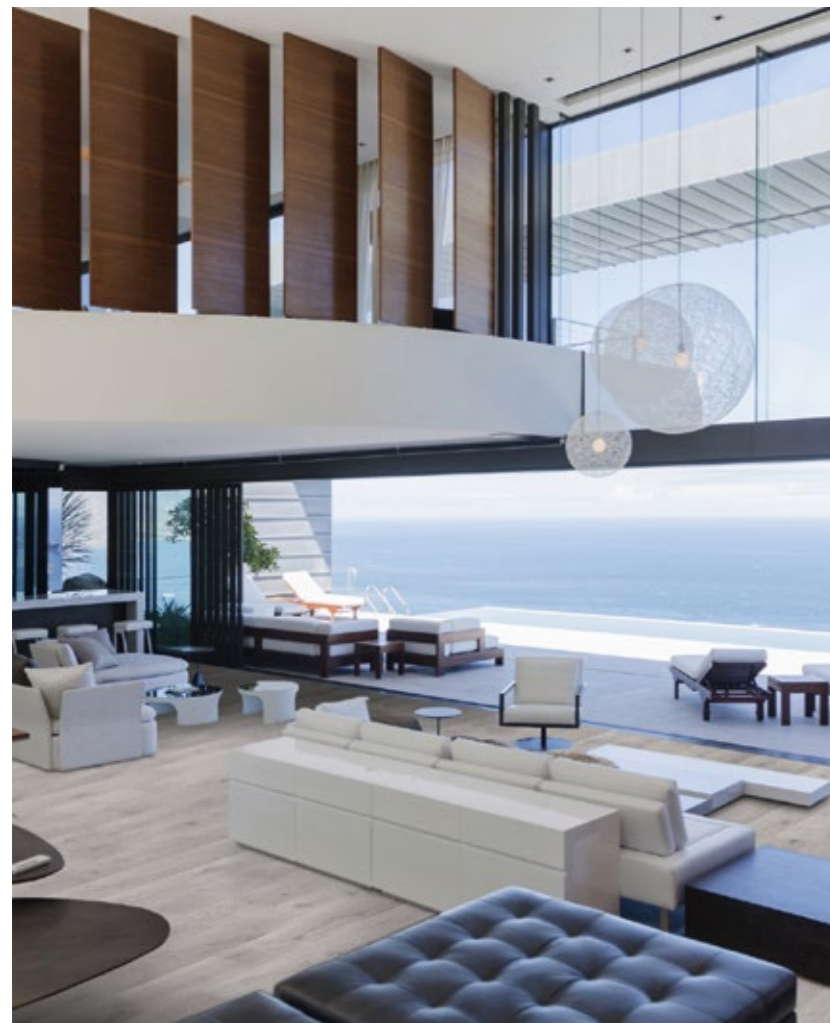

The product allows the natural texture of wood to be felt. Test the durability of the modern structure and see how the SENSES floor gives your interior a unique and exceptional style.

Welcome to the new dimension...

Trends for 2014/15 are characterised by high quality finishing combined with studied form. Minimalism and subtlety enable the character of individual elements of the arrangement to be brought out. The interior is given extra expression by contrasting sets of colours.

Distinctiveness of line

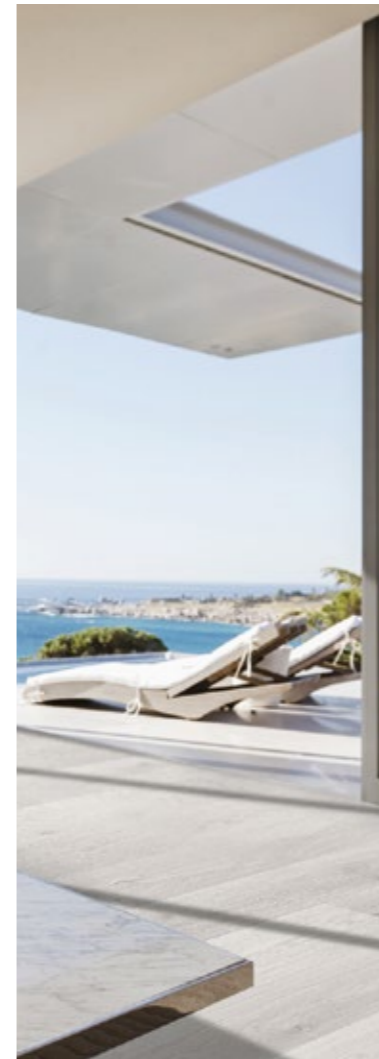

In the perfect interior nothing happens by chance. Correct selection of shapes and textures of elements, skilfully used in an arrangement, underlines the construction solutions proposed by the designer.

Harmony of colours

The subdued colour scheme of the interior enables harmony and balance to be maintained, and also creates an effect of incredible spaciousness.

Purity of form

The limited number of forms and textures creates a luxury interior with a transparent and well-arranged character. Wooden wall cladding stylishly harmonises with a carefully selected floorboard. The interior's distinctiveness is strongly accentuated by a designer construction column.

Big size 207

The fine noble product, which is a larger than a standard sized wooden board with a natural finish, is perfectly matched to an interior where modernism and elegance are what matters.

The wide range of colour schemes and finishes in matt lacquers and natural oils bring out the true beauty of wood.

The power of form minimal_simple

Arranging a minimalist interior requires great skill in working with forms and colours. A sparse style of arrangement emphasises the lightness and spaciousness of a room and displays the floor – the brushed and subtly whitened GENTLE oak.

GENTLE

GENTLE

An interior based on harmony and the intertwining of vertical and horizontal planes. The headboard crowning the bed frame becomes an extension of the boards used in the interior, which increases their power of expression.

GENTLE

GENTLE

Perfect perspective minimal_smart

The use of a contrasting object on the surface of the ceiling is a technique often applied by architects. The grey colour of the ceiling lowering harmonises stylishly with the bed frame and the other elements of the interior, including the subtly coloured TOUCH accent oak floor.

TOUCH

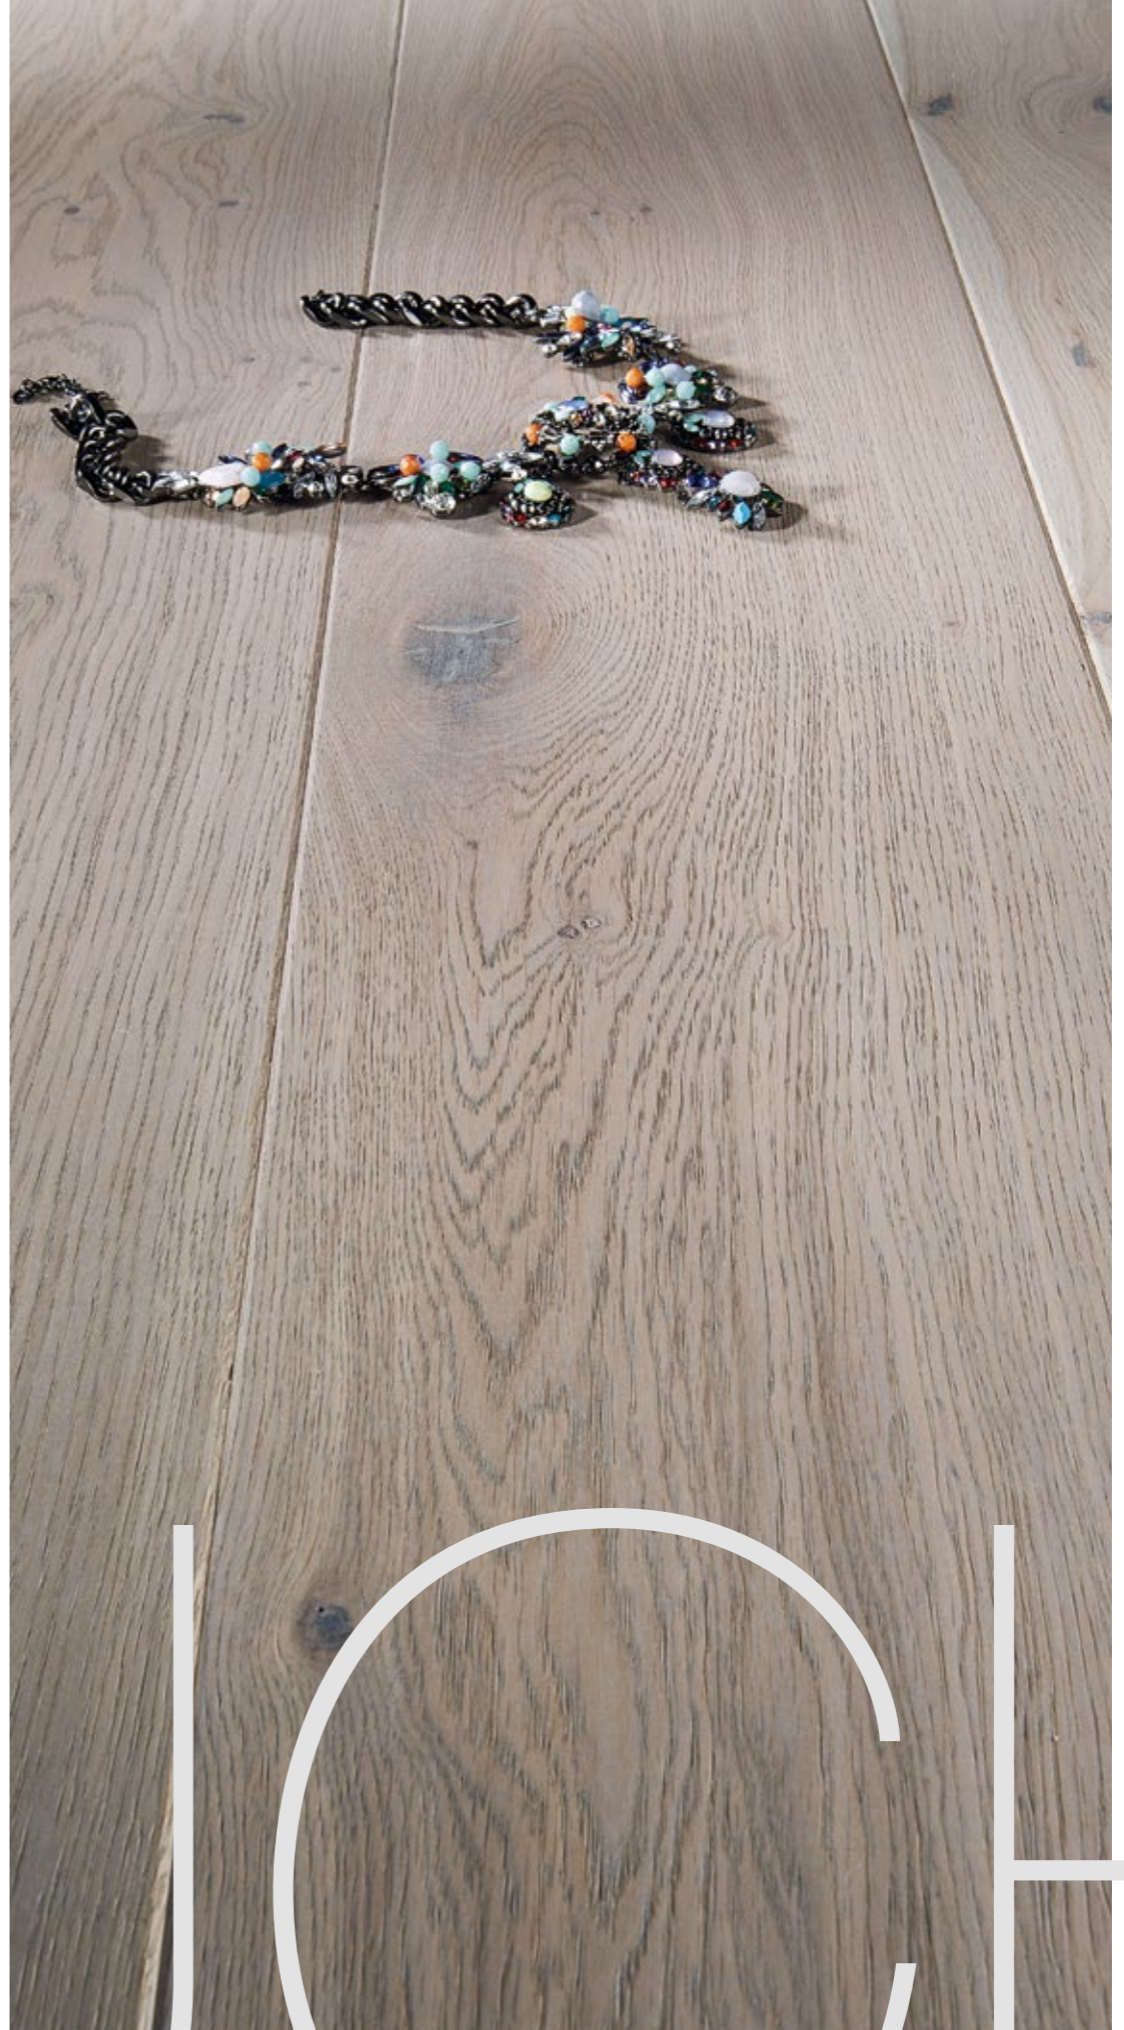

The introduction of light-reflecting planes into the interior, gives the space depth and expressiveness, and visually enlarges it. The shine effect along with the mirror image of selected elements of the décor, requires a well thought-out arrangement which leaves practically no room for chance.

TOUCH

TOUCH

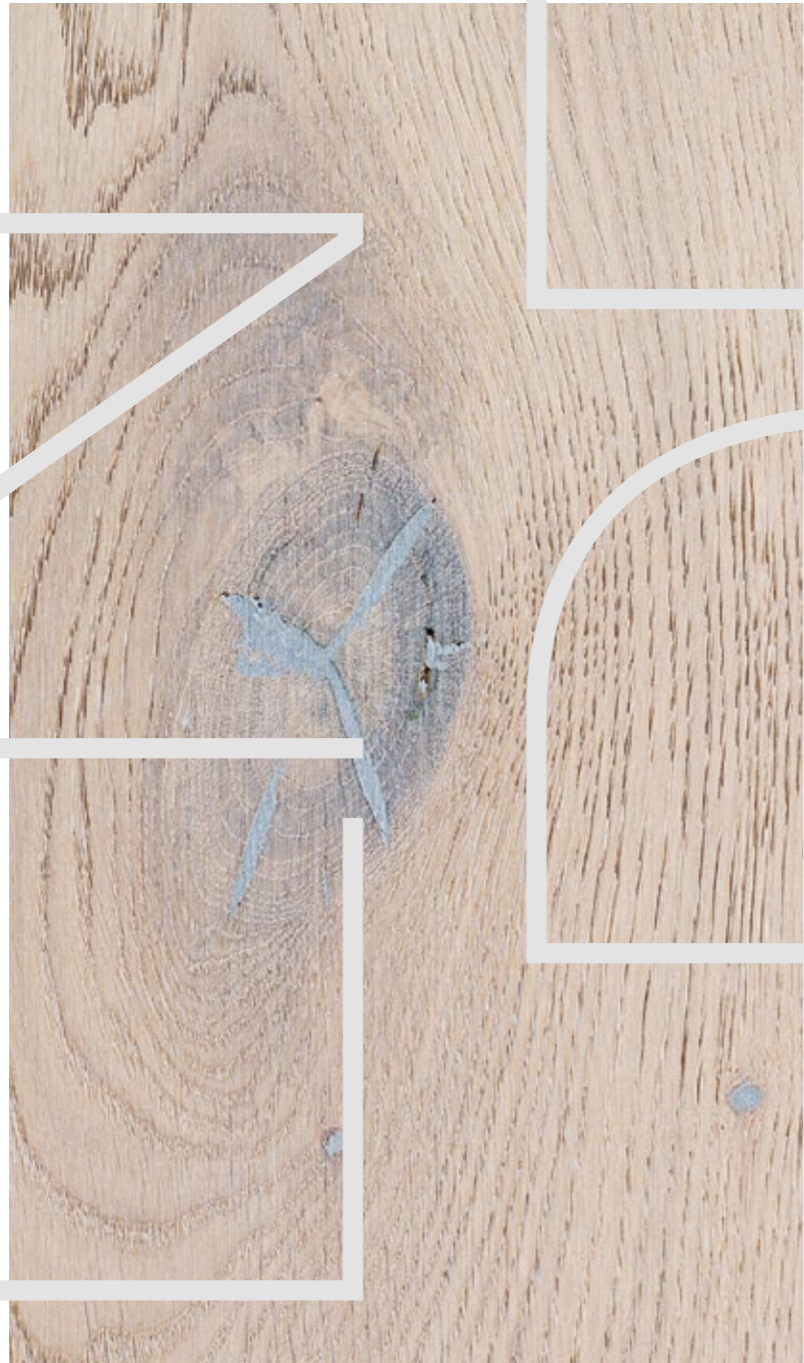

The order of things elegant_detail

An interior which is the essence of a simple take on elegance, showing its creator's particular attention to detail. The wall, finished with ceramic, has become a background which encases a television and displays a picture which blends in elegantly. The palette of colours works perfectly with the TENDER oak board.

TENDER

The floor's ideal plane does not compete with the dramatism of the individual elements in the arrangement, but helps bring out their unconventional nature. The exceptional width of the boards is emphasised by the clearly marked edges, and the wood's natural warmth calms and harmonises the arrangement.

TENDER

TENDER

The power of expression elegant_bold

Light and cosy spaces release positive emotions and are conducive to a relaxing atmosphere. The materials used in the interior enhanced with their delicacy, which contrasts stylistically with the rather raw form of the designer chair. This arrangement is perfectly complemented by the SENSE natural floorboard.

SENSE

SENSE

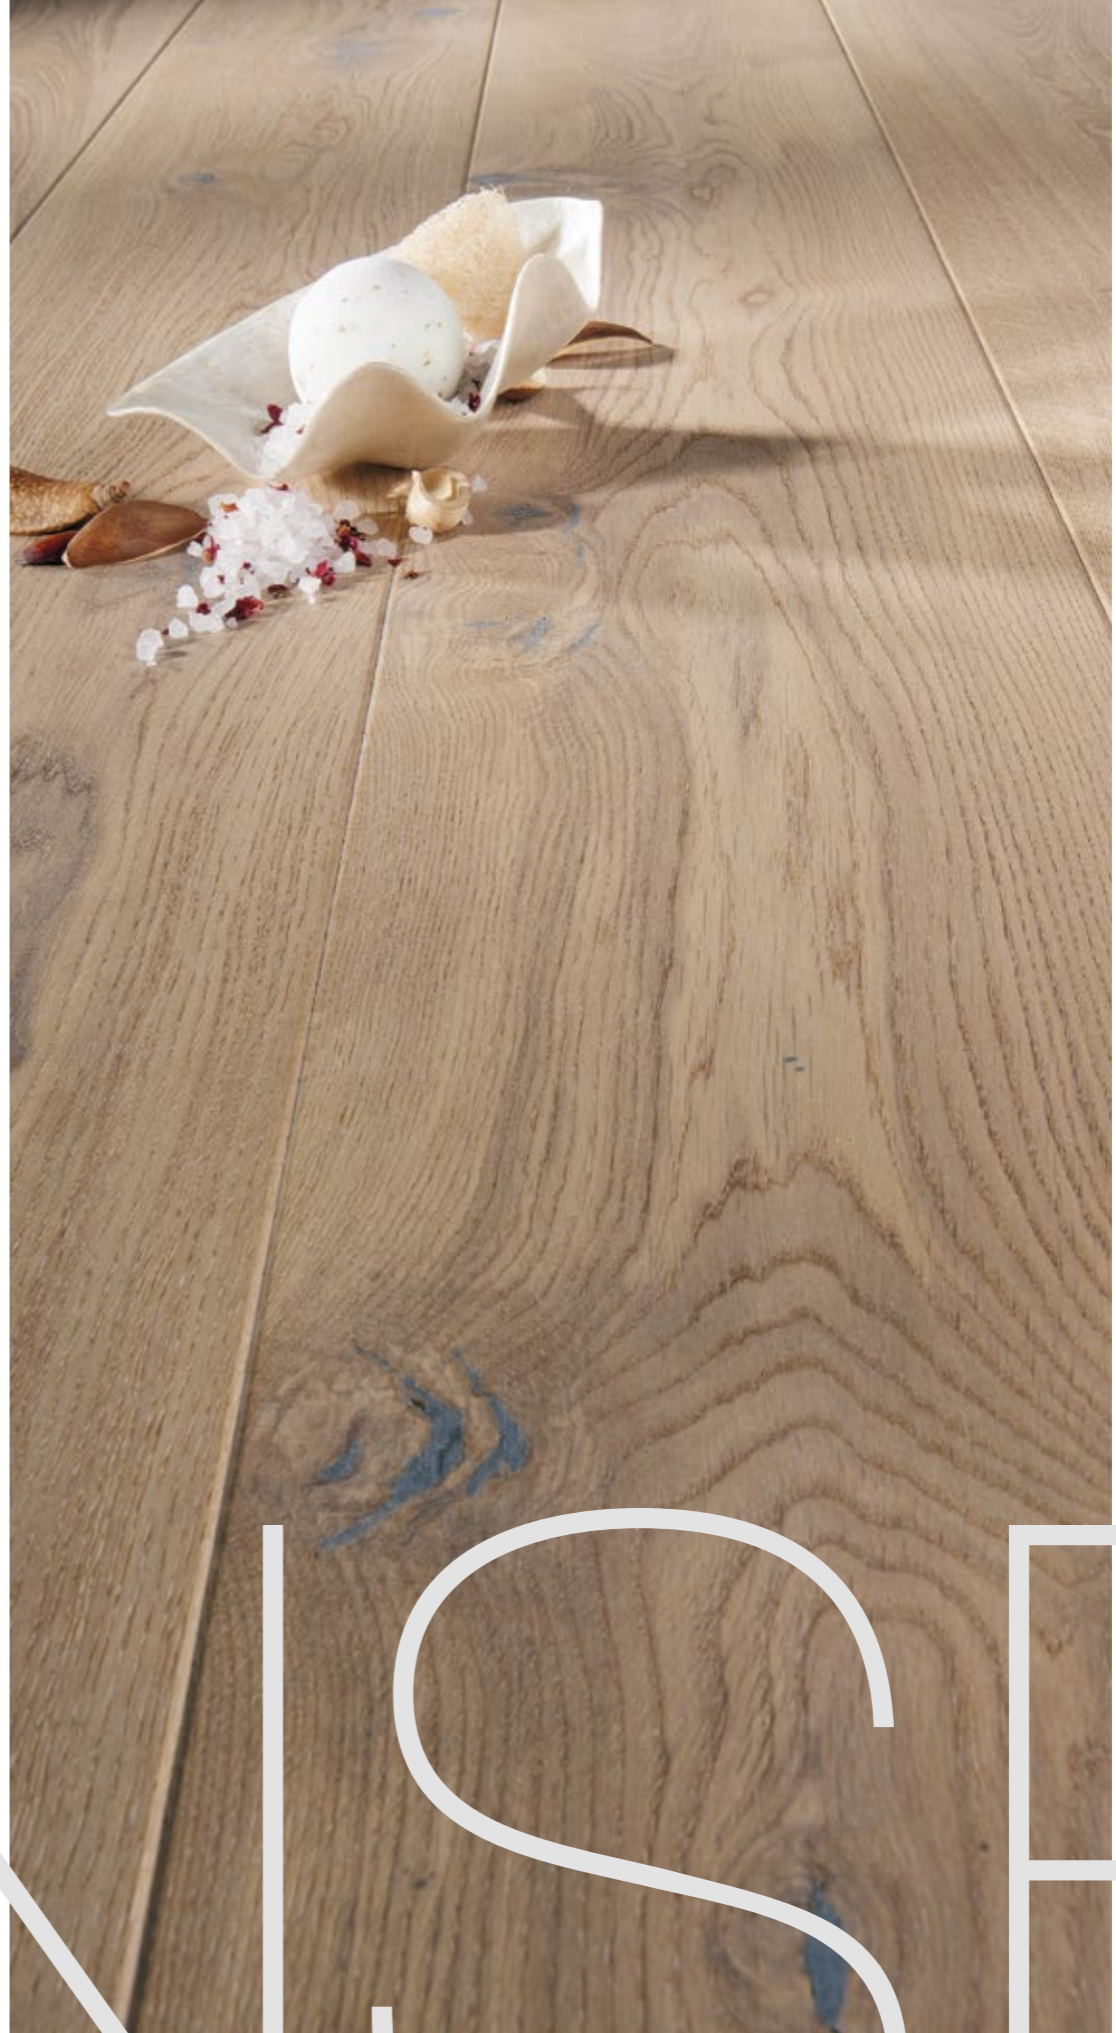

The natural wood used on the walls joins and blends in with the wood floor to form a completely new quality of space. The interior has a seductive warmth and natural feel. Despite the simplicity it remains sophisticated and full of elegance.

SENSE

A design classic classic_elite

Original stylish elements take on a new dimension in this interior, so that the arrangement as a whole personifies a new dimension of the classic. The light spaces and inspirations drawn from London residences are in perfect harmony with the classically elegant HARMONY oak floor.

HARMONY

The interior presents a design classic in a modern incarnation. An enormous advantage are the high windows, which illuminate the room. Small accessories and the open-work lamps arranged in an unexpected way stress the exceptional nature of the arrangement.

HARMONY

HARMONY

Impressive effect classic_noble

Classic armchairs with finishing in fine material, a decorative crystal chandelier and antique columns make an interior more luxurious and timelessly elegant. Walls in subtle colours and adorned with stuccowork create just the right background to display the qualities of the JOY wood boards' non-standard size and natural colour.

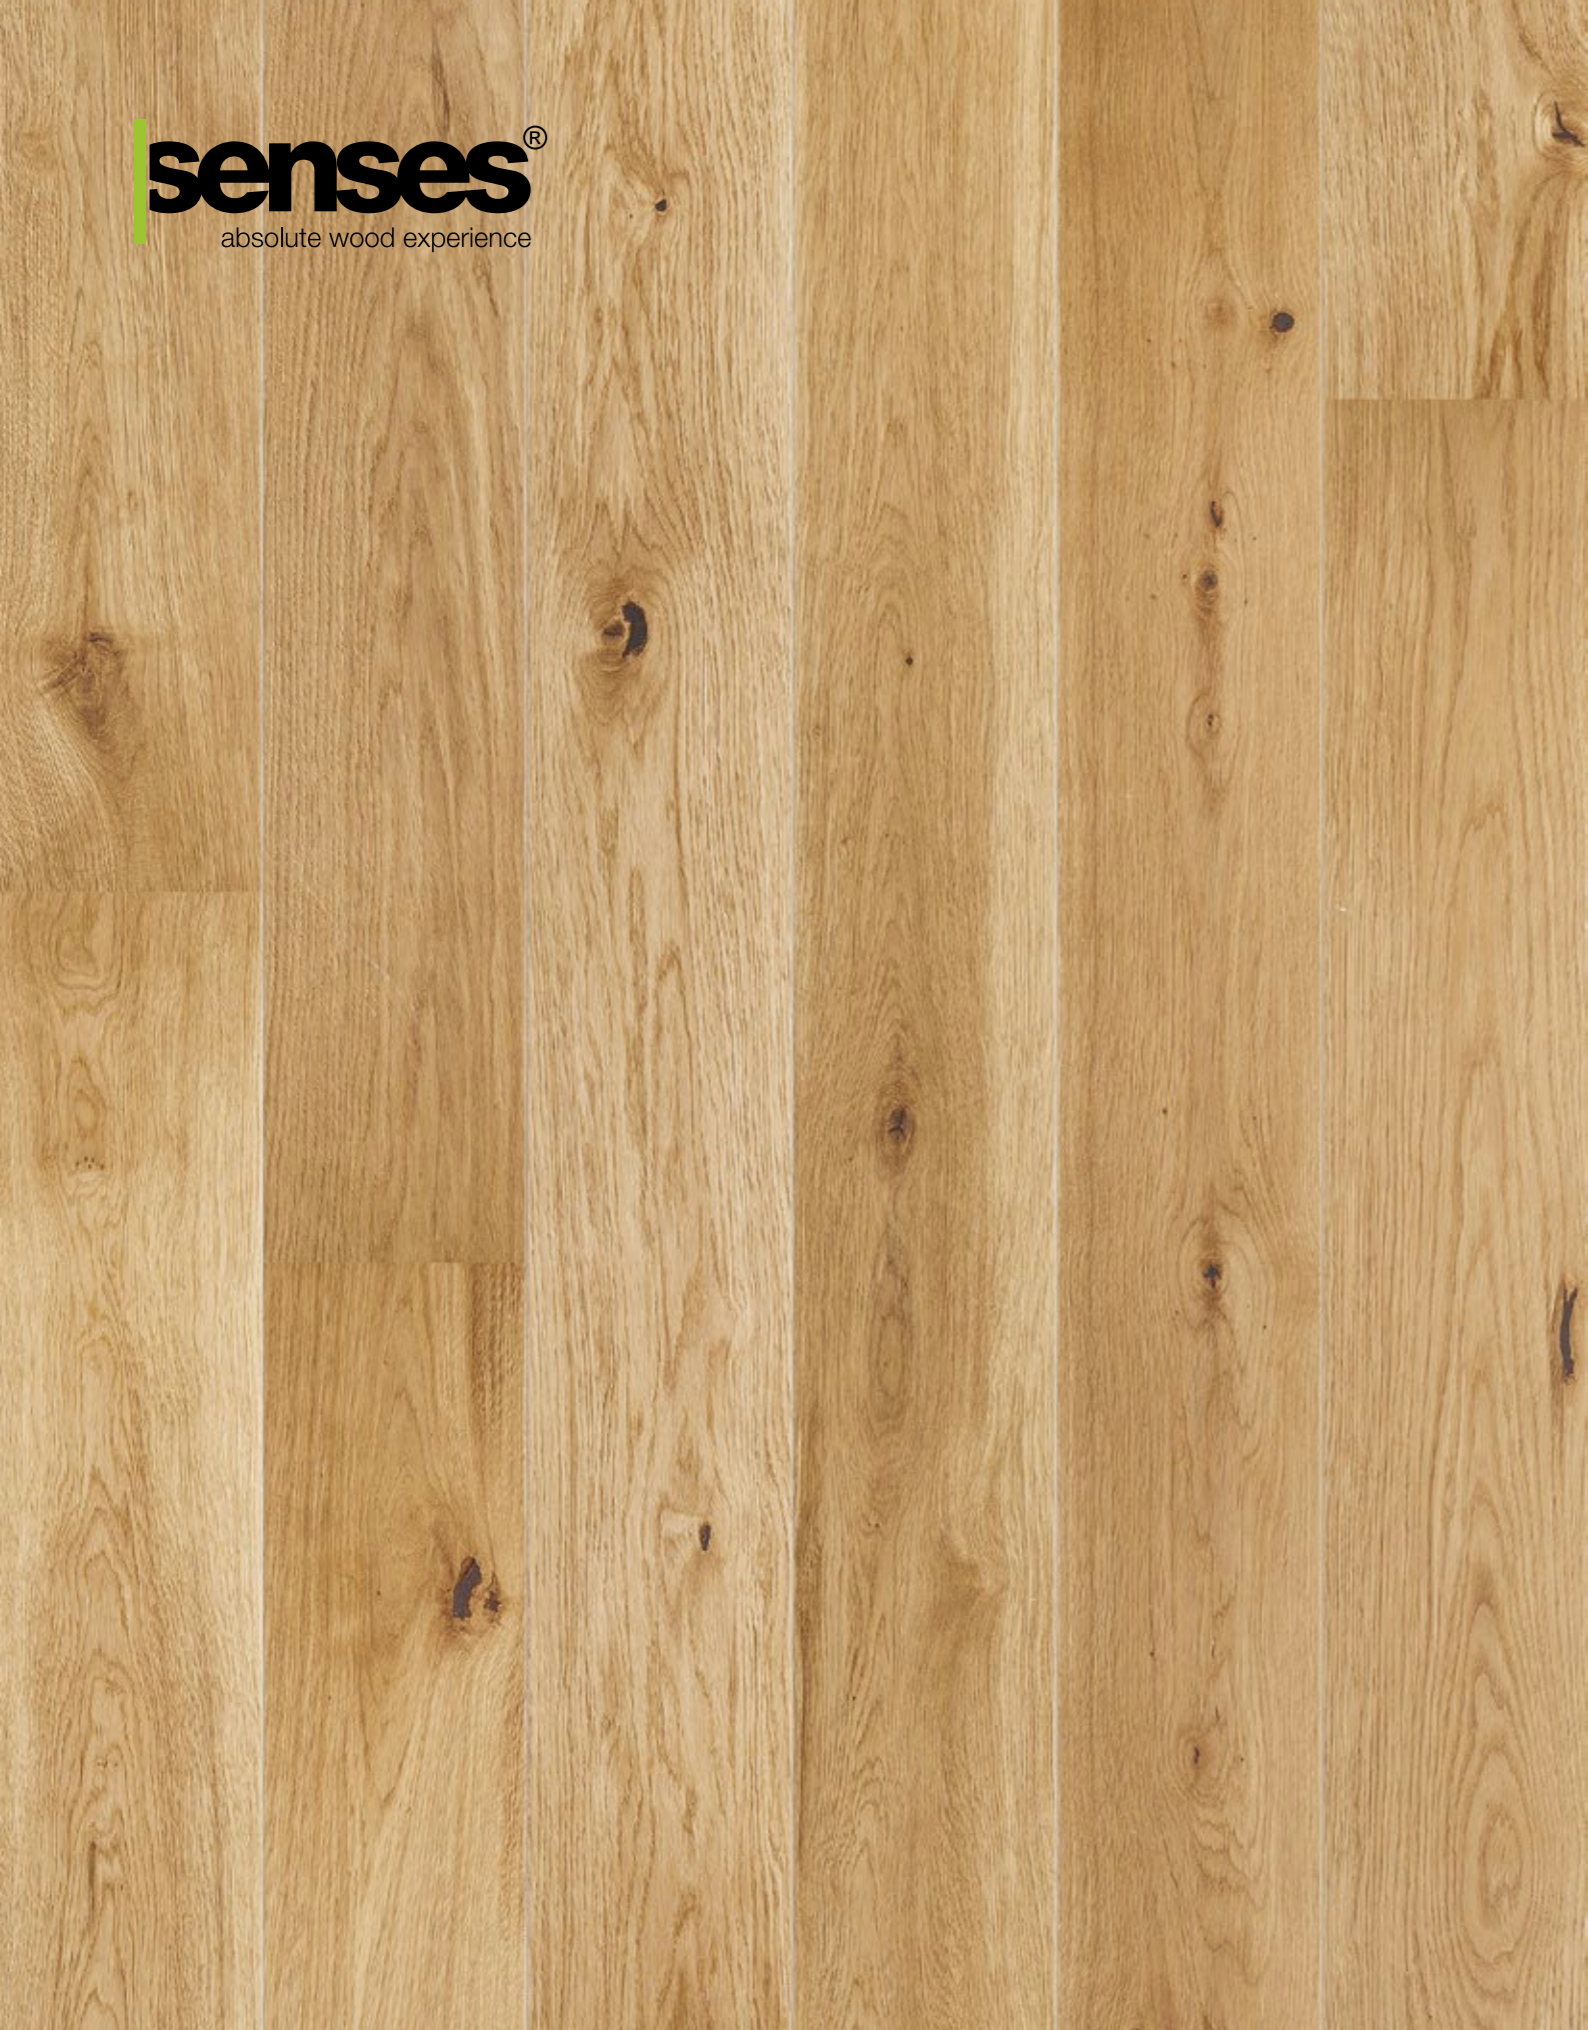

JOY

The application of rich profiling combined with taupe has provided an extraordinary effect. A colonial touch is given by the horizontal wooden blinds and stylized furniture from various corners of the world. Long thick, curtains accentuate the height of the room.

JOY

Travel through time rustic_natural

Playing with form and shape has produced an interior in the unconventional style of rustic industrial. The combination of two seemingly opposite and contradictory elements has enabled a stylish balance to be achieved between modern minimalism and natural cosiness. The INTENSE oak floor brings out the nuances of the arrangement.

INTENSE

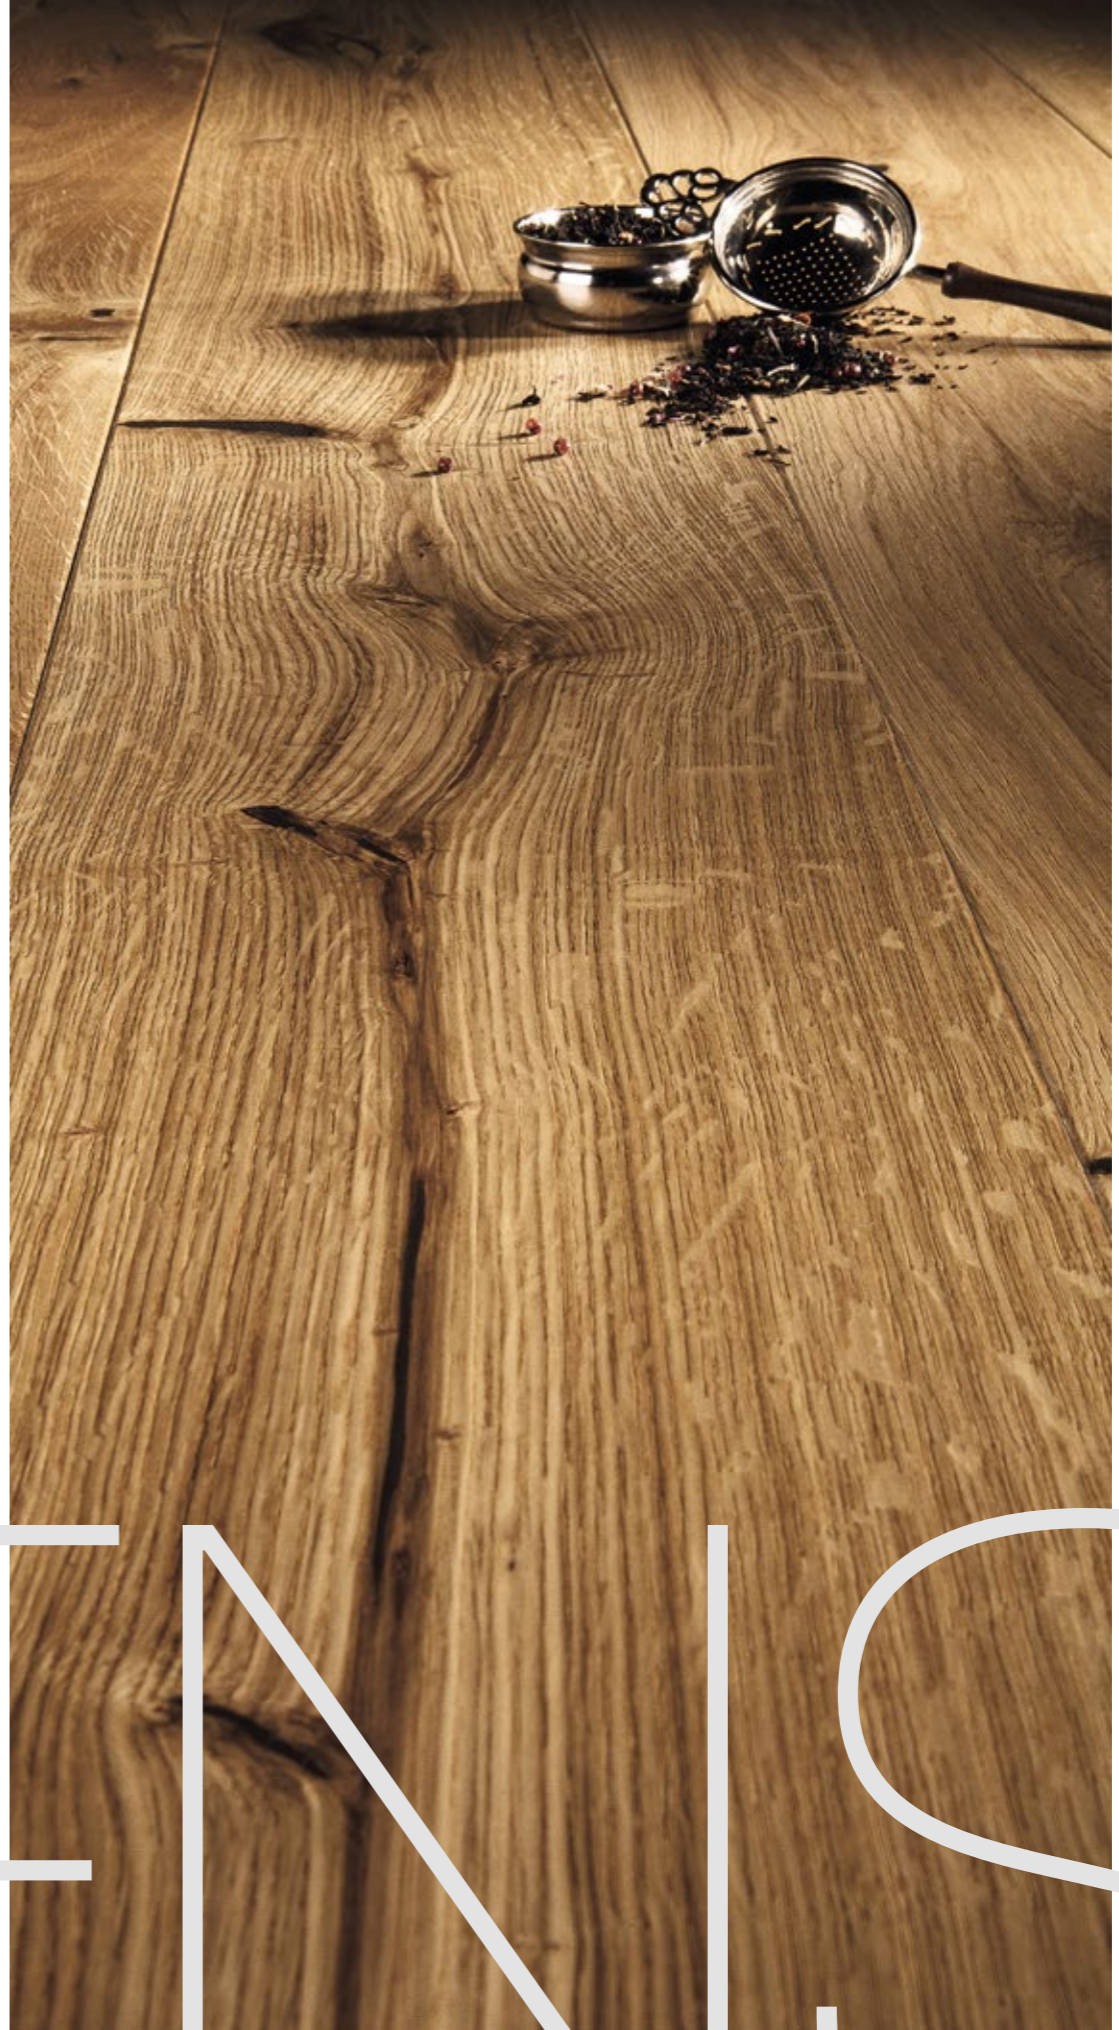

The teasing replacement of structural columns with tree trunks gives the interior an original character. Large sized window frames enable the space to receive the right amount of light and bring out the beauty of the subtle colour scheme in which the arrangement is maintained.

INTENSE

INTENSE

Quality of space rustic_vintage

An exceptionally stylish arrangement in a Scandinavian style. The fireplace warms the interior, and the minimal amount of furniture and accessories with simple forms intensifies the impression of spaciousness. The leading role in the interior is played by the EXCITE oak floor, whose distinct pattern determines the atmosphere of the room.

EXCITE

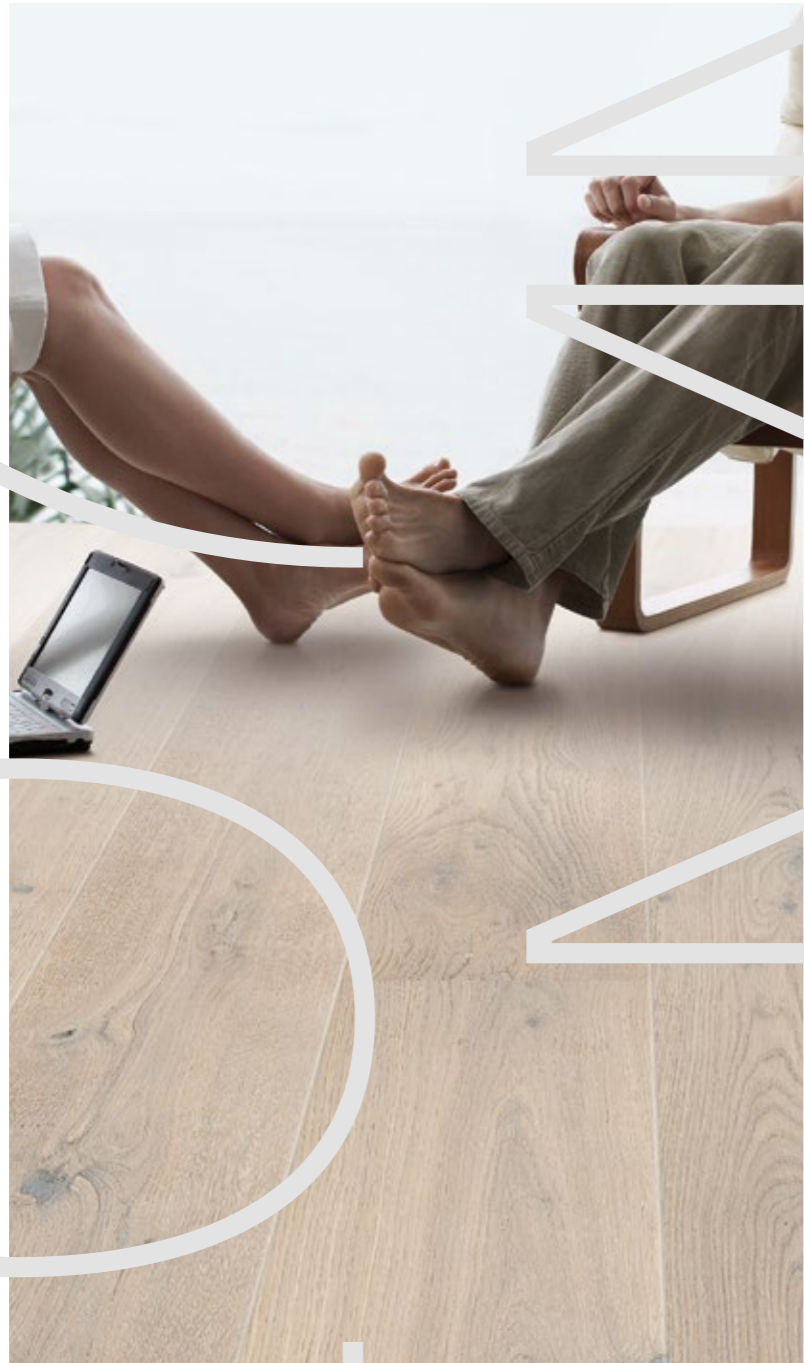

An unconventional effect achieved by minimized decorating. The rawness of the smeared plaster and cast iron columns supporting the ceiling has been broken up with elements which add warmth to the interior – a fireplace, cosy armchair and perfectly matched wood floor.

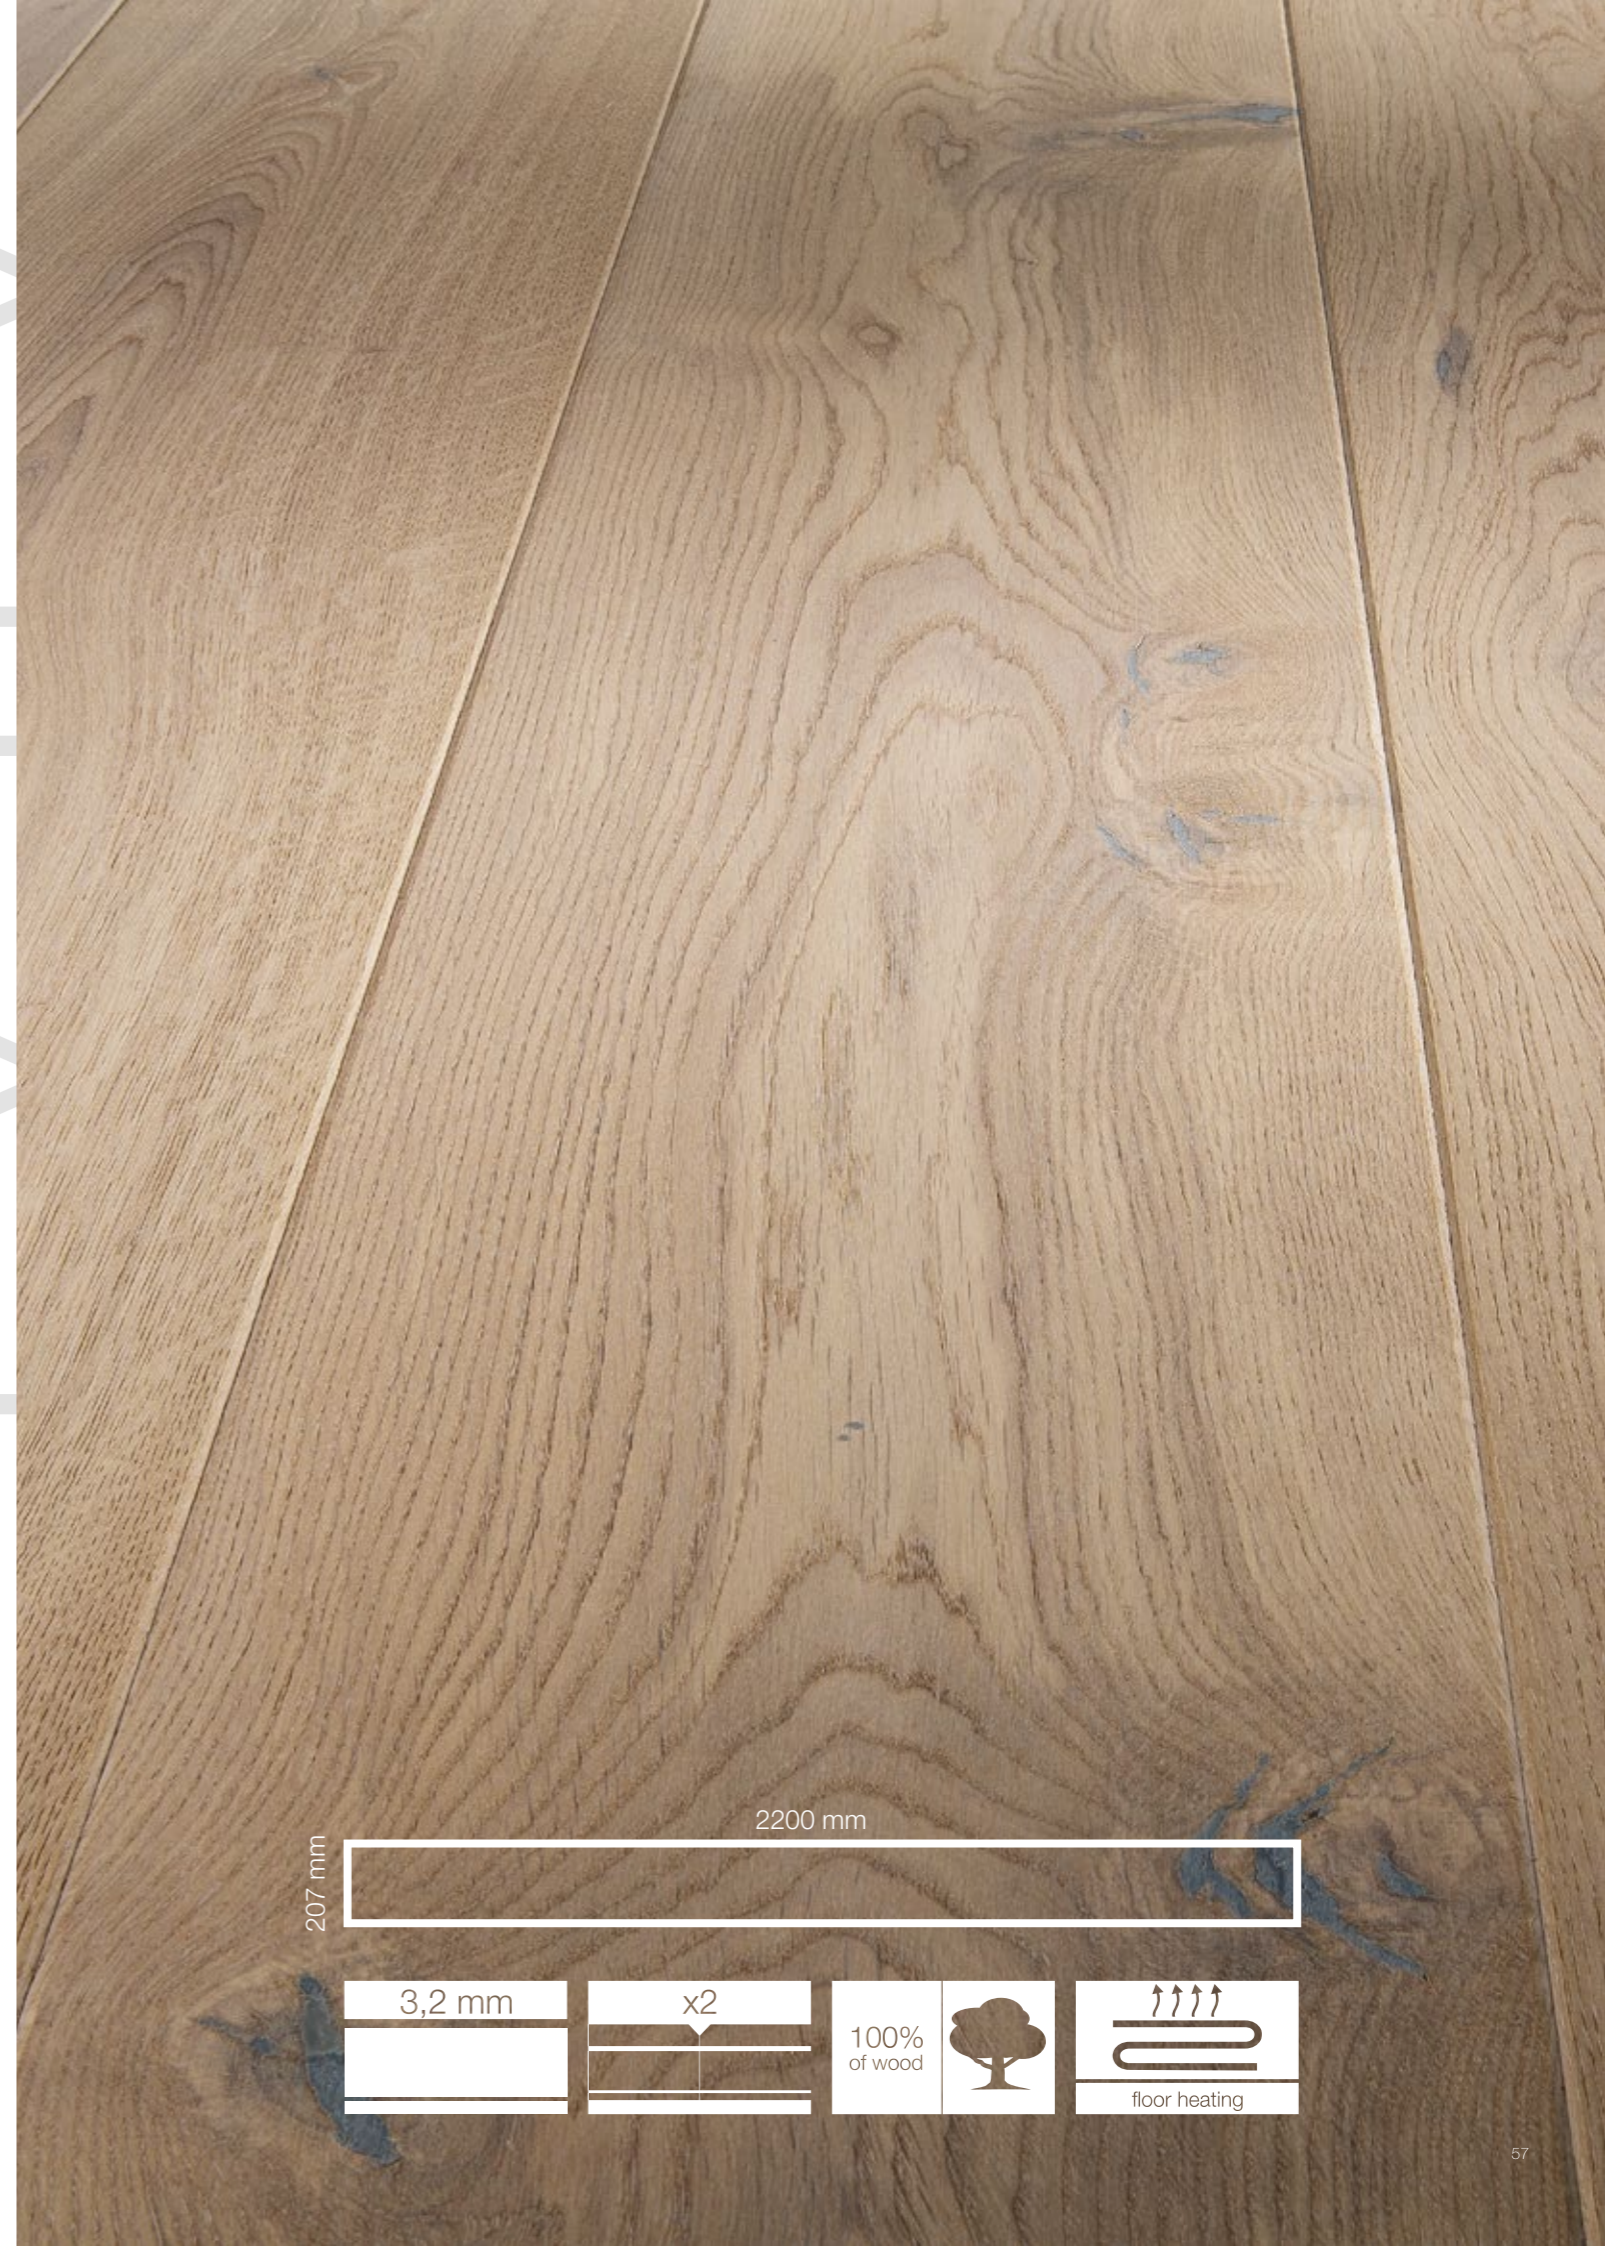

EXCITE

EXCITE

The most characteristic features of the floors from the SENSES collection are their dimensions. Greater than a standard width of the board (207 mm), this has been additionally emphasised by bevelling along the edges. The effect is rounded off by the 3.2 mm thick surface layer of oak. Thanks to the floor's cross structure it can be used over underfloor heating. The floor is easy to care for and keep clean.

The beauty of a luxury interior lies in the details. Individual skirting boards are offered for each of the floors in the SENSES collection, of a colour and texture perfectly matched to the specific décor of the floorboards.
